25 JAN 1965

Mr. Ruben F. Mettler
President
TRW Space Technology Laboratories
One Space Park
Redondo Beach, California

Dear Rube:

Joe Becker, who heads up the Agency's central computer operation, has made me aware of your kind invitation to him to observe demonstrations of your new four-station On-Line Computing Center to be held in Los Angeles on 27 January.

As you know, I am generally aware of this development and have considerable interest in it. While we would like to have Joe, plus several other officers, attend this demonstration, it is just not convenient to have them away from Washington at this particular time. What I would appreciate, if possible, is a briefing here in Washington sometime in the future at which time I would propose to have about six officers present. If this can be arranged, I would be appreciative.

Sincerely,

Albert D. Wheelon
Deputy Director
